Art Unit: 1756

1. A new oath or declaration is required because

It does not identify the foreign application for patent or inventor's certificate on which priority is claimed pursuant to 37 CFR 1.55, and any foreign application having a filing date before that of the application on which priority is claimed, by specifying the application number, country, day, month and year of its filing.

The wording of an oath or declaration cannot be amended. If the wording is not correct or if all of the required affirmations have not been made or if it has not been properly subscribed to, a new oath or declaration is required. The new oath or declaration must properly identify the application of which it is to form a part, preferably by application number and filing date in the body of the oath or declaration. See MPEP §§ 602.01 and 602.02.

2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to anticipate the invention, specifically the fine patterning of approximately a micron with light ions having energies of about 100 KeV or less and the recited flux. The prior art uses high atomic weight atoms, higher flux, higher energies or fail to define patterns. As noted in the parent application the applicant is correct that the Amaral reference teaches away from lowering the dosage of He to 10^{16} ions/cm² based upon its reduced effect relative to Ne at similar doses. The submission of a clean specification clear the air with respect to which copy of the specification should be used and clearly allows the examiner to accord dates to the various embodiments. The embodiments using light ions other than He are accorded only 07/12/2000, while the He embodiments go back further to the French priority document.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. This application is in condition for allowance except for the following formal matters:

The oath is defective as it does not identify the parent application and its status, the PCT or the French priority document. Also please correct the status of the parent application to indicate that it is - - now abandoned—in the specification.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

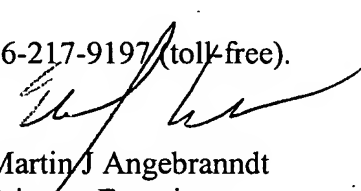

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
